field: angle-scale v_d (μm/ns)
177 V/cm: v_d = 15.7
248 V/cm: v_d = 24.9
319 V/cm: v_d = 33.5
390 V/cm: v_d = 38.8
(a)
strip-sum signal (normalised)
time after leading edge t (ns)
(b)
fitted $w - w_0$ (μm/ns)
reference slope $\tan\theta_{ref}$
X
Y
(c)
mean of the four
geometric gap L/tan θ
gap $g = v_d T$ (mm)
drift field E (V/cm)
