

- X strips
- Y strips
- M3 reference track $\pm 1\sigma/2\sigma$ pointing ($\sigma \approx 0.2$ mm)

Cosmic muons in 3-D — charge cloud vs M3 reference track

Each point is one strip signal (circle = X plane, square = Y plane) placed at its strip position and drift depth, colored by amplitude; the green line is the independent M3 telescope track, drawn with its measured $\pm 1\sigma/2\sigma$ pointing envelope (~ 0.2 mm).
