

Fewest strips on any view of either leg

PRELIMINARY

The reconstruction needs ≥ 10 , so the left edge is the existing cut and not a feature of the data. Dashed is the same arm pair EVENT-MIXED — an accidental by construction. Where it lies under the data a cut here removes both alike; where they separate, there is something to cut on. Values off the axis are excluded from the curve but not from its normalisation, and the key gives the fraction.
