

The summed image, sliced through the capsule

Filled: each topology's excess, stacked. Black: their sum. Grey dashed: the identical construction with one shuffled null as the data and the other as its null — what the map shows with no source at all. Copper: the capsule (± 10 mm transversely; its 80 mm gas length in y). ntof_athens_26/pair_vertex_imaging | 33 runs of the condor full pass, chambers A, C, D; both legs slope-measured and not in a noisy column, within 60 mm of the axis
