

The pointing band in y, before and after the y-plane cuts

A track from a source at y_s lies on a line of slope s/L through $(y_s, 0)$, where s is the y angle scale; the capsule is 80 mm long, so the band is a smear of such lines. Horizontal line at 0: y slopes the timing did not measure; vertical stripes: noisy y columns. ntof_athens_26/pair_vertex_imaging | 33 runs of the condor full pass, stage-3 tracks, chambers A, C, D
